About

Full-Stack Developer with 1.5+ years of experience designing scalable applications, optimizing system performance, and delivering user-focused solutions in agile environments.

Education

Acharya Institute of Technology, BE in Information Technology
GPA 8.4/10

Aug 2019 – Aug 2023

Technologies/Skills

Java, C, C++ Python, JavaScript, HTML/CSS, SQL, MongoDB, TypeScript, React.js, Angular, Vue.js, Express.js, REST API, GraphQL, Node.js, GIT

Experience

Solutions Engineer, Tata Technologies – Bangalore, Karnataka

February 2024 – Present

- Collaborated with Airbus France teams in Toulouse to develop and optimize a mission-critical web application for managing aircraft design studies, improving project monitoring and planning accuracy.
- Built responsive and interactive front-end components using **Vue.js**, enhancing user engagement.
- Engineered scalable backend services with **Node.js** and **Express.js**, implementing complex business logic and secure RESTful and **GraphQL** APIs.
- Utilized **GraphQL** to streamline data fetching, improving frontend flexibility and reducing server load by enabling precise, client-defined queries.
- Designed efficient, schema-less data structures using **MongoDB**, supporting high-performance data access for technical workflows and analytics.
- Automated CI/CD pipelines with **Jenkins** and managed version control, code reviews, and collaboration using **GitHub** within a distributed team.
- Delivered advanced data visualizations and dashboards to help teams make informed decisions based on complex study data.
- Gained hands-on experience in full-stack development using **React.js** for the frontend, **Express.js** for the backend, **MySQL** for data storage, and **Sequelize.js** for ORM-based database integration.
- Designed a scalable and efficient backend architecture with over **15 normalized tables**, enabling seamless handling of financial and team-related data.
- Developed a comprehensive full-stack financial dashboard to manage and display data for **100+ projects**, supporting multi-currency operations (**5+ currencies**) and incorporating team assignment and user management features to help project leads efficiently oversee **150+ users** across various projects.
- Utilized **Redux.js** for centralized state management and integrated **React ApexCharts** to deliver a seamless, real-time user experience with interactive visualizations of over 2 million dollars in financial data from the past 2 years, presented through 10+ chart types.

Software Development Engineer, GeekyAnts – Bangalore, Karnataka

July 2023 – Nov 2023

- Designed and developed a user-friendly dashboard and a new website using React, improving data organization, increasing user engagement by 20%, and driving a 40% surge in traffic—equating to 100 additional visitors.
- Elevated website visibility on search engines through SEO optimization and bolstered security by integrating Google Recaptcha, reducing spam and malicious activities by 30
- Proficient in JavaScript, React, Redux, Firebase, SQL, TypeScript, Tailwind CSS, Next.js.

Projects

Smart Classroom

- Developed a secure MERN-based e-learning platform with Spring Boot backend support, enabling instructors to share video lectures and resources, resulting in a 30
- Tools Used: MongoDB, Express JS, React JS, Node JS, Spring Boot, JWT, Multer, Bootstrap

Placement Training Portal

- Developed a full-stack portal to streamline placement management and recruiter onboarding, with integrated systems for student learning and placement tracking.
- Tools Used: ReactJS, NodeJS, NoSQL, Express JS, Swapper API
